Declaration of absence - phthalates

RPC Superfos has never intentionally used phthalates in the production of plastic packaging.

Some resin suppliers are using some phthalates in the catalyst system during their production and this may result in traces in the product.

RPC Superfos meets the requirements of EU 10/2011 and any subsequent amendments thereto. Consequently we on a continuous basis in collaboration with our suppliers document that any possible trace of phthalates in our product do not exceed the limits stated in 10/2011.

The present certificate is valid for a period of one year starting from the date first above written.

If you have any questions you are welcome to contact us.

Best regards,

RPC Superfos

A handwritten signature in dark ink, consisting of several overlapping loops and a horizontal line at the end.
